Raynham: Overnight Drilling for Utilities, March 18 – 21
Single Lane Closures on Route 24 North and South

MassDOT's contractor, SPS New England, will perform overnight directional drilling for utilities **on Monday, March 18, through Thursday, March 21, from 7:00 PM each night to 5:00 AM the following morning**. The work will take place at the end of South Street West and South Street East adjacent to Route 24. The contractor will make every effort to minimize noise during the overnight hours. The work will require closure of a single right lane on Route 24 North and South adjacent to Route 44. The closures will be implemented **from 8:00 PM each night to 5:00 AM the following morning**. They are necessary to allow the contractor to access the areas at the end of South Street West and South Street East near Route 24 for the directional drilling.

The schedule for this project is weather dependent and subject to change without notice.

Visit the project website, www.mass.gov/route44over24 for more information. For project questions or comments, please email route44over24@dot.state.ma.us or contact Dan Fielding, MassDOT Highway Division Legislative Liaison, at 857-368-8959.
